

## Special Issue

# Fibroblasts: Key Mediators of Regeneration, Inflammation and Fibrosis (Volume II)

### Message from the Guest Editor

This Special Issue will focus on fibroblasts and their critical role in a variety of diseases. In particular, for this Special Issue, contributions dealing with the characterization of fibroblasts, their mechanistic and metabolic switches from tissue-resident fibroblasts to proliferative myofibroblasts, fibrometabolism, the homing of fibrocytes to sites of inflammation, model systems of fibrosis, and therapeutic interference to prevent or treat fibrosis are highly encouraged.
