Magnesium in Health and Disease

Message from the Guest Editor

In the last three decades, the importance of magnesium content for cell function and the regulation of several metabolic, immunologic, neurologic, cardiovascular, obstetric, and oncologic conditions has increased exponentially together with a better understanding of the transport and energetic mechanisms that regulate magnesium homeostasis at the cellular and subcellular level, as well as at the systemic level. The ultimate intent of this monographic Special Issue on magnesium in health and disease is to provide the interested readers with a collection of reviews and original research articles on key physiological and pathological conditions, to enhance the understanding of the major physiological roles magnesium ions play in eukaryotic cells and the major organ systems of the human body, and how the alteration of cellular and systemic magnesium homeostasis through therapeutic approaches, and endocrinopathies can result in the onset, progression, and severity of major pathologies and their complications in several organ systems.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
