Wound Healing: From Mechanisms to Therapeutic Approaches

Message from the Guest Editor

A wound determines a cascade of chemical and morphological events, aimed at hemostasis, the prevention or arrest of infection, the removal of damaged tissue, and finally tissue repair. A disturbance or alteration of these events creates the conditions for the formation of a chronic wound, keloids, or hypertrophic scars that are not easily resolved by therapy. Obviously, a thorough knowledge of the cells and molecules involved in the tissue response to trauma is important to actively control the response to surgical operations and therapies used that are currently assuming ever greater importance in the control of wounds. Therefore, the aim of this Special Issue is to stimulate research and clinical interest in this exciting field and to serve as a point of reference for those involved in addressing the problems posed by wounds and their healing.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPUS / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
