Current Perspectives on Gynecologic Cancers

Message from the Guest Editor

Gynecologic cancers—encompassing malignancies of the cervix, ovaries, uterus, vulva, and vagina—remain a critical global health challenge, accounting for significant morbidity and mortality among women worldwide. Despite advancements in screening and treatment, these cancers persistently highlight disparities in access to care, variable therapeutic responses, and unmet needs in survivorship. This Special Issue, *Current Perspectives on Gynecologic Cancers*, seeks to illuminate the rapidly evolving landscape of research and clinical practice, offering a synthesis of cutting-edge discoveries, translational innovations, and multidisciplinary approaches that are reshaping the field. By compiling reviews and original research, this collection underscores the importance of interdisciplinary collaboration—bridging oncology, genetics, bioengineering, and public health—to translate scientific discovery into equitable clinical practice. We invite readers to explore these contributions, which collectively aim to redefine standards of care and inspire future innovation in the fight against gynecologic cancers.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
