Pathogenesis and Treatment of Biliopancreatic Cancer

Message from the Guest Editor

Biliopancreatic cancers, including pancreatic cancers, cholangiocarcinoma, and gallbladder cancer, occur with an increasing incidence, with a large proportion accounting for fatalities related to metastatic disease. This Special Issue aims to publish cutting-edge research on both preclinical and clinical studies on these cancers, including a comprehensive overview of tumor progression in association with the tumor microenvironment, metastatic process, cancer treatment, immune response, or drug resistance. In the evolving landscape of oncological research, understanding the genetic and epigenetic alterations that underpin these cancers is crucial. We are particularly keen on submissions that explore the latest advancements in diagnostic tools, predictive biomarkers, and personalized treatment approaches. The intricate dance between cancer cells and the immune system, especially in the context of emerging immunotherapies, is another area of profound interest.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
