

## Special Issue

# Molecular Mechanisms and Treatment of Alzheimer's Disease

### Message from the Guest Editors

Despite decades of intense scientific effort, the mechanisms responsible for the development of cognitive dysfunction in Alzheimer's disease (AD) remain largely obscure. As a result, the development of effective treatment options has been met with failure.

This Special Issue, "Molecular Mechanisms and Treatment of Alzheimer's Disease", will focus on recent advances in identifying molecular and cellular mechanisms underlying the pathophysiology of AD and how they may guide novel treatment paradigms. In the same vein, building upon these scientific breakthroughs are (pre)clinical studies which may inform about the underlying mechanisms behind AD and its treatment options. We invite you to contribute a research paper, preclinical study, or review on the newfound mechanisms and novel treatment paradigms for AD in this Special Issue.

---

### Guest Editors

Dr. Antonius M. J. VanDongen

Department of Pharmacology and Cancer Biology, Duke University,  
Durham, NC, USA

Dr. Nicodemus Oey

Singapore General Hospital, Singapore City, Singapore

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

---

### Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
