

## Special Issue

# Pediatric Dermatology and Inherited Skin Diseases

### Message from the Guest Editors

This Special Issue will analyze the most relevant aspects and updated information about pathogenesis, clinical features, diagnosis, comorbidities, and treatment of the main issues of pediatric dermatology, such as **atopic dermatitis**, **allergic contact dermatitis**, **pediatric psoriasis**, and **infantile hemangiomas**. Atopic dermatitis and allergic contact dermatitis are diseases manifesting clinically as dermatitis and pruritus. Due to the identical morphology of skin lesions, diagnosing contact allergy in atopic children may be difficult. Childhood-onset psoriasis has recently received increasing attention, particularly because of its significant medical, and psychological burdens and its associated comorbidities. Infantile hemangiomas are the most common pediatric vascular tumors, and despite their benign nature, they may have serious consequences, possibly affecting the aesthetic and functional outcomes as well as representing dramatic life-threatening conditions.

### Guest Editors

Prof. Dr. Domenico Bonamonte

Department of Biomedical Science and Human Oncology - Section of Dermatology, University of Bari, Bari, Italy

Dr. Angela Filoni

Section of Dermatology, "Vito Fazzi" Hospital, 73100 Lecce, Italy

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
