Peripheral Nerve Stimulation

Message from the Guest Editor

Peripheral nerve stimulation is one of the fastest-growing procedures. We have witnessed the development of new peripheral nerve stimulator devices and technologies, including battery operated, wireless, permanent and temporary devices. In addition, lead design and wave forms are different in contrasting devices. Placement of leads close to peripheral nerves require good knowledge of the anatomy of the different nerves, in addition to good experience with localizing them by using the appropriate imaging technique. In this Special Issue, we will be discussing the most up to date knowledge about peripheral nerve stimulation. Topics include but are not limited to: Anatomy of the peripheral nervous system; Mechanism of action of peripheral nerve stimulation; Peripheral nerve stimulation for headache; Peripheral nerve stimulation of the upper extremity; Peripheral nerve stimulation for truncal pain; Peripheral nerve stimulation of the lower extremities; Peripheral nerve stimulation for neuroaxial pain/medial branches. About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA

2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
