

## Special Issue

# Emerging Insights into Malaria

### Message from the Guest Editors

Despite the efforts and measures implemented over many years to control malaria, it is still one of the most prevalent public health concerns in the world. Several studies have been performed in recent decades to elucidate the mechanisms involved in its pathogenesis and host–parasite relationship, the discovery of novel drugs for treatment and chemoprevention, and the application of vaccines and methodology employed for vector control, among others. The results of this and future research may elucidate mechanisms that support the goals of malaria control and elimination. This Special Issue will address all research that provides new insights into the pathogenesis, novel treatments or treatment regimens, diagnostic methodologies, and control of malaria vector mosquitoes.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLUS / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
