# **Targeted Therapies for Cancer**

# Message from the Guest Editors

Over the last two decades, the new insights into the biology and the signaling pathways of tumor cells and cells of the tumor microenvironment involved in tumor growth and spread, led to the development of the so called targeted therapies. Their cornerstone is represented by the identification of specific molecular and cellular targets, endowed with a pivotal role in cell growth and survival, useful for cancer diagnosis and actionable in anti-tumor strategies. To date, several targeted therapies were developed and many of them have been recently approved by the Food and Drug Administration for treating different types of cancer. At present, the most commonly investigated targeted therapies are based on the use of small molecules inhibitors, monoclonal antibodies and immunotoxins. In this context, also nano-delivery systems can be easily included among the cell targeted therapies. Indeed, they exploit the presence of tumor-associated antigens on the cell surface of tumor cells and cells of the tumor microenvironment, to specifically deliver their payload (e.g. chemotherapeutics, small molecule inhibitors, siRNA) to diseased tissues, while reducing healthy organs uptake.

# **About the Journal**

# Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access iournal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

#### Editor-in-Chief

#### Prof. Dr. Felipe Fregni

- Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
- 2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
