New Techniques and Materials for Biomedical Applications

Message from the Guest Editor

Different materials, from polymers and ceramic to nanomaterials and their derivatives, are currently being explored as attractive alternatives to traditional medicinal materials for several biomedical applications. For instance, polymeric matrices are the most widely employed systems for preparing controlled release pharmaceutical dosage forms due to their low-cost and straightforward manufacturing process. Along with polymers, other biomaterials with specific abilities to interact with biological structures are being developed for different devices with nanoarchitectures intended for biomedical applications. There has also been increasing interest in endogenous polymers as components of delivery systems within this field. Therefore, this Special Issue intends to cover different biomaterials' science and clinical applications, from synthesizing new biomolecules to nanodevices.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
