Immunotherapy for Urothelial Carcinoma: Milestones and Future Horizons

Message from the Guest Editor

Over the last decade, remarkable advances have been made in the urothelial carcinoma (UC) therapeutic landscape. Nowadays, in addition to the conventional chemotherapeutic approach, we can offer advanced UC patients immune checkpoint inhibitors (ICIs), antibody–drug conjugates (ADCs) and targeted agents (TAs). The UC immunotherapy era, which began with PD-1/PD-L1 inhibitor monotherapy, is currently evolving towards immune combinations with chemotherapy, radiotherapy and targeted agents and ICI adoption in the early disease stages. An increasing number of UC patients will receive immunotherapeutic treatments in the years to come. Therefore, the acquisition of further data from preclinical and clinical models and the detection of prognostic and predictive biomarkers will be crucial to tailoring and optimising the therapeutic strategy for the individual UC patient.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
