

Special Issue

Advanced Biomedical Research on COVID-19 (2nd Edition)

Message from the Guest Editor

SARS-Cov-2 has spread rapidly worldwide, with significant unexplainable differences in the rapidity of spread between countries. A real-time polymerase chain reaction (RT-PCR) obtained via nasopharyngeal swab was the most widely used method of detection for identifying the virus, but antibody testing also reveals specific IgG/IgM against SARSCoV-2. Although SARSCoV2 is highly contagious, neonates born to women with asymptomatic or symptomatic COVID19 are rarely infected with the virus. This Special Issue aims to implement the current knowledge about novel diagnostic, prognostic, and therapeutic procedures for optimal management of COVID-19. Studies addressing maternal-fetal antibody status and obstetric outcomes of COVID-19 during pregnancy are of particular interest.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
