

## Special Issue

# Gastrointestinal Cancers: From Diagnostics to Novel Therapeutic Approaches

### Message from the Guest Editor

Gastric cancer continues to be one of the leading causes of cancer death, despite significant advances in understanding its causes, etiology, diagnosis, and treatment over the past few decades. In particular, for gastric cancer, the effectiveness of treatment is maximized by improving the efficiency of early diagnosis through developing diagnostic technologies. However, there is still a shortage of specific anticancer drugs for gastric cancer, indicating the absence of a standard treatment. As a result, there is an emerging need to discover biomarkers and conduct research on the associated signaling mechanisms in order to secure optimized early diagnosis technology. Consequently, we invite authors to submit original research and review papers focusing on the fundamentals, molecular mechanisms, and treatment of gastric cancer, spanning from diagnosis to treatment. Through this, our goal is to enhance the understanding of gastric cancer and explore effective diagnosis and treatment methods.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
