Special Issue

Angiogenesis in Health and Disease

Message from the Guest Editor

Angiogenesis plays a critical role in fetal development, postnatal growth, recovery from injury, cancer progression and metastasis, inflammation, and metabolic disorders. In some situations, both coordinated angiogenesis and aberrant angiogenesis can co-exist in the same organ. Understanding how coordinated angiogenesis is achieved and the mechanisms by which aberrant angiogenesis occurs in different biologic contexts can help us gain a better idea of how to assist healthy organ growth and modulate disease progression. In this Special Issue, we will focus on the metabolisms that affect angiogenesis, genetic and epigenetic modulations of angiogenesis, and innovative methods that can either assist coordinated angiogenesis or inhibit unwanted aberrant angiogenesis. Review articles or research studies relating to healthy or deranged angiogenesis are welcome.

- angiogenesis
- angiogenic factors
- endothelial cells
- smooth muscle cells
- reactive oxygen species
- nitric oxide
- glycolysis

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access iournal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

- Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
- 2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
