

## Special Issue

# Biliary Tract Cancer: A Molecular Challenge

### Message from the Guest Editor

Biliary tract cancers are cancers with a very poor prognosis. Current treatments are not very effective. Cancers of the intrahepatic bile ducts, extrahepatic bile duct and gallbladder have different molecular characteristics, different prognosis and different responses to treatments. Improving the management of these cancers will necessarily require a better knowledge of molecular abnormalities and the development of targeted therapies. These cancers being rare an international collaboration is necessary to quickly improve their management. **Keywords:** rare cancers; tumor molecular analysis; targeted therapy; immunotherapy; basket trial; umbrella trial; international collaboration

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLUS / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
