

## Special Issue

# Lung Cancer: Tumor Progression and Target Therapy

### Message from the Guest Editors

The aim of the present Special Issue will be focused on well-designed studies and research able to improve our knowledge of lung cancer, our understanding of the mechanisms underlying tumor initiation, propagation, and progression, and ameliorate the influence or change direction in lung cancer diagnosis and therapy. As a consequence, these works may give the basis for novel therapeutic approaches, early or more specific diagnostic procedures. Not only clinical but also basic science research is encouraged. In addition, works aiming to translate basic knowledge into the clinic, such as treatment and prevention, diagnosis, and novel therapeutic modalities, will be also considered. Articles in this Special Issue may include reviews and researcher papers. The issue comprehensively covers many areas of interest and could be of interest to a broad range of readers, including physicians, scientists, students, and pharmaceutical companies.

### Guest Editors

Prof. Dr. Alberto Ricci

Department of Clinical and Molecular Medicine, Sapienza University of Rome, Rome, Italy

Prof. Dr. Rita Mancini

Dipartimento di Medicina Clinica e Molecolare, II Facoltà di Medicina e Chirurgia, Policlinico S. Andrea, Università "La Sapienza", 00189 Roma, Italy

### Deadline for manuscript submissions

closed (30 April 2023)

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
