# Discovery of Novel or Alternative Interventions for Cancer Immunotherapy

# Message from the Guest Editor

Cancer immunotherapy has become a new modality of cancer treatment over the past decade. However, the majority of patients receiving immune checkpoint inhibitors still develop resistance eventually. Therefore, combinatory treatment regimens are vigorously tested in both preclinical and clinical settings. There is an urgent need to find novel small-molecule drugs with immune-modulating and anti-oncogenic properties. We hope to obtain some studies on cancer immunotherapeutics based on novel small molecules (synthesized or inspired by natural compounds). Cuttingedge research should include: New classes of small-molecule drugs with immunotherapeutic potential; New cancer-immune biomarkers;

New Al-assisted drug and cancer-immune biomarker discovery. We are soliciting original articles and reviews involving new small-molecule compounds for cancer immunotherapy.

# **About the Journal**

# Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access iournal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

#### Editor-in-Chief

#### Prof. Dr. Felipe Fregni

- Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
- 2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
