Frontiers in Gastrointestinal Oncology: Advances and Trends in Multi-Disciplinary Patient Care

Message from the Guest Editor

Optimal care of patients with cancers, particularly those in the digestive system, requires integration of the clinical expertise of professionals across multiple health disciplines. Research in population science and genetics has been translated to facilitate early detection of cancer and improve treatment outcomes. Technological advances have been applied for developing diagnostic tools as well as surgical and radiological interventions. Molecular biomarkers and targets have been exploited to achieve the goal of precision cancer treatment. Music and arts are being explored for psychosocial support in cancer patients. This Special Issue of *Biomedicines* focuses on recent advances in gastrointestinal oncology including cancer epidemiology, cancer genetics, diagnostic modalities, therapeutic interventions, and psychosocial support, with the hope of facilitating early detection of cancers in digestive organs, and improving treatment outcomes in patients with these malignant diseases.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA
2. Department of Epidemiology, Harvard T.H. Chan School of Public Health, Boston, MA 02115, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
