Advanced Research in Prostate Cancer 2.0

Message from the Guest Editor

Over the past few years, we have witnessed major advances in prostate cancer treatments. The trend, as for many cancer types, is moving toward the development and clinical use of biomedicine-based approaches. Large-scale genomics projects have led to the ongoing development of several targeted therapies, and, importantly, the co-development of biomarkers will allow for the prediction and measurement of patient response. This Special Edition of *Biomedicines* entitled ‘Advanced Research in Prostate Cancer’ will include reviews that describe major advances which have occurred in the treatment of prostate cancer over the past few years as well as original research articles that describe preclinical and/or translational studies which will support future advances.

On behalf of the *Biomedicines* journal, it is my pleasure to invite you to submit an article to this Special Edition. Articles should be focused on the development and use, or potential use, of biomedicines. Articles which outline how genetic analyses can guide the development and use of these treatment options, or which describe innovative drug delivery strategies, are also welcomed.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
