Immunotherapy for Combatting Genitourinary Tract Cancers

Message from the Guest Editor

Dear Colleagues, Nowadays, the immunotherapeutic approach, such as using immune checkpoint inhibitors, has been widely applied as an alternative effective option against advanced genitourinary tract cancers that are refractory to first-line chemotherapies and targeted agents. Despite enhanced clinical efficacy and reduced side effects, more reliable predictive biomarkers, combination strategies to overcome limited efficacy and therapeutic resistance of single immunotherapy, novel innovative immune-modulatory tools should be investigated through comprehensive translational research for optimized personalized immunotherapy. In this Special Issue, high-quality original research articles, review papers, and meta-analysis papers will be invited and considered for peer-reviewed publication.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

1. Neuromodulation Center and Center for Clinical Research Learning, Spaulding Rehabilitation Hospital and Massachusetts General Hospital, Harvard Medical School, Boston, MA 02114, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPLUS / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
