Advancements in Intelligent Natural Language Systems for Biomedical or Public Health Applications

Message from the Guest Editor

This Special Issue on "Advancements in Intelligent Natural Language Systems for Biomedical or Public Health Applications" aims to explore the latest developments and innovations in the field of natural language processing (NLP) applied to biomedical research, healthcare, and public health. With the increasing availability of large-scale biomedical and consumer health data, there is a growing need for intelligent systems that can effectively extract, analyze, and interpret information from textual sources such as scientific literature, electronic health records, and patient-generated data. This Special Issue will feature cutting-edge research and advancements in the design, development, and evaluation of NLP techniques and systems tailored specifically for biomedical or public health applications. Topics of interest include but are not limited to biomedical text mining, clinical decision support systems, biomedical ontologies, semantic annotation, information retrieval, and machine learning approaches for biomedical or consumer health text analysis.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *BioMedInformatics* (ISSN 2673-7426).

BioMedInformatics is an international, multidisciplinary, peer-reviewed and scientific open access, open source journal that encourages authors to submit high-quality original research papers and in all areas of biomedical informatics, as well as computational biology and medicine. Systematic Reviews will also be considered for publication. *BioMedInformatics* is published quarterly online by MDPI. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Alexandre G. De Brevern

Department of Biological Research on the Red Blood Cells, INTS,
INSERM UMR_S 1134, Université de Paris, Université de la Réunion,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
