Dentistry and Cranio Facial District: The Role of Biomimetics

Message from the Guest Editor

We are pleased to announce a new Special Issue titled “Dentistry and Cranio Facial District: The role of Biomimetics”. New technologies, such as digital devices, are available to enhance the effectiveness of Diagnosis, and Treatment in dentistry and in all the cranio facial district, in the field of biomimetic design, constructions, devices, and operations. The applications of new biomaterials and techniques can lead to a significant advance in all of the main dental branches, such as restorative dentistry, prosthodontics, oral surgery, implantology, pediatric dentistry, orthodontics, and temporomandibular disorder patients. Authors conducting studies on these themes are welcome to submit original research articles, reviews, short communications, case series, and case reports.
