Special Issue

Biomimetic Approach to Dental Implants: 2nd Edition

Message from the Guest Editors

This Special Issue addresses the challenges and opportunities associated with translating biomimetic concepts of dental implants from the laboratory to clinical practices. Some of its focal points include, but are not limited to, the following:

- Studies on novel surfaces and implant materials;
- Studies on factors affecting dental implant osseointegration;
- Reviews of implant resorption, surgical techniques, and operative protocols;
- Studies on the peri-implant wound healing process;
- Studies on the cellular and molecular signals induced by the implant surface;
- Studies on periimplantitis and new treatment modalities.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Stanislav N. Gorb
Department of Functional Morphology and Biomechanics, Zoological Institute, Kiel University, 24118 Kiel, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q2 (Biomedical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
