

Special Issue

Bio-Inspired Technologies and Soft Robotics

Message from the Guest Editors

This Special Issue primarily focuses on bio-inspired soft robots that perform work traditional rigid robots cannot handle. Based on our understanding of biomechanics, we are particularly interested in robotics that can safely and effectively interact with humans and complex environments. By working closely with biologists, material scientists, mechanists, and computer scientists, one can use soft materials to build robots inspired by natural animals. We are interested in articles of this form. We are also interested in papers introducing the user experience of working closely with industry professionals and customers, thus accelerating the development of soft robotic technologies to transform into products that meet real-world requirements.

Assistant

Guest Editors

Prof. Dr. Li Wen
Dr. Fei Pan
Yun Wang

Deadline for manuscript submissions

closed (10 March 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Stanislav N. Gorb

Department of Functional Morphology and Biomechanics, Zoological
Institute, Kiel University, 24118 Kiel, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, Ei Compendex, CAPlus / SciFinder, and other
databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q2
(Biomedical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17 days after
submission; acceptance to publication is undertaken in 3.8
days (median values for papers published in this journal in
the second half of 2025).
