# **Special Issue**

# Biomimetic Fabrication and Manufacturing

## Message from the Guest Editors

To further its aims of combining basic research and applications, this Special Issue is divided into two main parts:

- Part a) Materials, covering topics such as bioinspired materials; biomimetic structures; biomimetic manufacturing; mechanical biomimetics; molecular biomimetics; functional biomimetics; smart materials; and hierarchical structure design.
- Part b) Applications, including optical measuring; gas analysis; electric sensors; acoustic devices; microrobots; wearable devices; and medical supplies.

We believe that this initiative will fill an important gap in biomimetic fabrication and manufacturing, and will stimulate the enthusiastic contributions of leading experts in the field.
