

Special Issue

Selected Papers from NanoBio&Med 2017

Message from the Guest Editors

Emerging nanobiotechnologies can offer solutions to current and future challenges in medicine. By covering topics from regenerative medicine, tissue engineering, drug delivery, bionanofabrication, and molecular biorecognition, this Special Issue aims to provide an update to trends in nanobiomedicine and development of novel biologically inspired devices for safe and effective diagnosis, prevention, and treatment of disease. This Special Issue is cooperating with the NanoBio&Med 2017 conference (<http://www.nanobiomedconf.com/NBM17/index.php>). All speakers and registered participants at this conference are invited to submit a manuscript for publication.
