Paris, Paris, France

Deadline for manuscript  
submissions:

**closed (30 April 2021)**

### Message from the Guest Editor

Dear Colleagues,

Bionanocomposites can be defined as a group of materials consisting of a biological component associated with another counterpart, which can be of diverse chemical nature, being either organic, including biomolecules, or inorganic. What defines *bionanocomposites* as a group is the idea of using biomolecules to integrate, i.e., make use of, their molecular recognition properties to direct assembly of functional structures and/or drive interactions with living systems. This is particularly relevant for solving problems in a biomedical context and is based on an interdisciplinary approach based on chemistry and supramolecular self-assembly, nanotechnology, and regenerative medicine. This Special Issue aims to illustrate the diversity of approaches, particularly in the choice of biomolecules and the nature of the associated counterpart—biomolecules, polymers, inorganic nanoparticles—defining bionanocomposites with their great modularity and offering an almost infinite number of accessible functions.

Dr. Carole Aimé

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Peter E. Nielsen

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,  
Blegdamsvej 3C, DK-2200  
Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer  
Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
