Deadline for manuscript
submissions:

closed (30 November 2022)

Message from the Guest Editor

We are announcing a Special Issue of *Biomolecules* on the “GABA Receptors in Pharmacology and Neurobiology” in order to highlight the importance of GABA-mediated transmission during neurodevelopment and different psychiatric and neurological disorders. γ -Aminobutyric acid type A receptors are the main inhibitory mediators in the central nervous system, and are seen as promising therapeutical targets since they mediate the rapid synaptic as well as the slow extrasynaptic inhibitory neurotransmission. Agonists of GABA-B receptors are useful muscle relaxants and antinociceptive in acute pain models. GABAergic neurons are the key players in regulating neuronal circuits, and deficits in GABAergic signalling underlie the pathophysiology of several psychiatric and neurological conditions from anxiety and insomnia to epilepsy. Thus, elucidating the pharmacological and neurobiological potential and molecular properties of GABA receptors as well as developing more selective therapeutical targeting drugs with less side effects remain a challenge in modern drug discovery. Submissions dealing with different perspectives of GABA receptors are welcome.

an Open Access Journal by MDPI

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
