Message from the Guest Editor

Dear Colleagues,

In this Special Issue entitled "*Novel Molecules for Cancer Treatment*", we encourage authors to submit high-quality research articles dealing with novel biomolecules, and provide a strong evidence of their anti-tumor potential activity to the scientific and clinical community. This activity could be observed both in solid tumors or in hematological malignancies, and be evaluated with in vitro and/or in vivo models. On the other hand, we are open to receiving updated reviews about novel molecules or treatment strategies based on synthetic or natural compounds, which could provide a rationale for further clinical oncology research.

I look forward to receiving your manuscripts.

Dr. Javier Martinez Useros

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
