Deadline for manuscript
submissions:

20 July 2024

Message from the Guest Editors

Deciphering the stemness status in the model of the human epidermis, as well as that of the mechanisms controlling the potentialities of the stem cells of this tissue such as self-renewal, constitutes a challenge on a fundamental level, but also for the design of next-generation biotherapies.

This Special Issue welcomes original research and review articles focusing on state-of-the-art and novel knowledge on the molecular identifiers of human epidermal stem cells and the molecular effectors involved in controlling their fate and functions. The covered areas include but are not limited to:

- Epithelial stem cells from the interfollicular epidermis and hair follicles;
- Molecular identifiers and phenotypic markers;
- Regulation of stemness, self-renewal, and differentiation orientation;
- Protein-coding genome, non-coding genome, epigenetic factors;
- Molecular dialogues with other skin resident cells;
- Molecular responses to exposome factors and stimuli;
- Pathophysiological molecular dysregulations affecting epidermis stem cells;

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
