Deadline for manuscript  
submissions:

**31 December 2020**

### Message from the Guest Editors

The progression of cancer is known to be associated with changes that upset the balance of the cell cycle, affecting the suppression of cell death pathways, the increase of cell proliferation, the dysregulation of cell differentiation, and the reduction of interactions between cells and the stromatic tissue. TRP channels are known to play crucial roles in many fundamental processes of life such as fertilization, sensory transduction, cell survival, and development.

It is a great pleasure to invite you and your teams, as experts from different backgrounds (medicine, immunology, clinics, genetics, molecular biology, and epidemiology), as well as those who work in the field of cancer and TRP channels to contribute original or review research articles to this Special Issue. We are particularly interested in articles that try to evaluate a possible link between TRP channels and cancer from a pathological point of view and in the induction of pain.

an Open Access Journal by MDPI

## Editors-in-Chief

### Dr. Vladimir N. Uversky

Molecular Medicine, University of  
South Florida, Tampa, USA

### Prof. Csaba Szabo

Chair of Pharmacology, Section  
of Science and Medicine,  
University of Fribourg, Fribourg,  
Switzerland

### Prof. Dr. Anna Rita Franco Migliaccio

Department of Biomedical and  
NeuroMotor Sciences, Alma  
Mater Studiorum University,  
40126 Bologna, Italy

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** Indexed in the Science Citation Index Expanded (SCIE - Web of Science) and in **Scopus**. Citations available in MEDLINE (PubMed), full-text archived in PubMed Central.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2020).
