Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editor

In the past several decades, a mitochondria-centric vision has stepped into the fields of cell, organ, and organismal physiology, demonstrating exponential growth. Dysfunctional mitochondria or dysfunctional mitochondria dynamics have been linked to many pathological conditions. However, these alterations appear to more strongly affect the highly specialized and delicate cells of the central nervous system (CNS), contributing to the onset of a variety of diseases ranging from rare childhood disorders (e.g., Leigh syndrome or mitochondrial encephalopathy with lactic acidosis and stroke-like episodes) to more common age-related neurodegenerative conditions (e.g., dementia, Alzheimer's disease, and Parkinson's disease).

This Special Issue is designed to emphasize the link between the (dys)function of mitochondria and CNS disorders, likely highlighting common or discrepant mechanisms underlying them. In this regard, we would like to invite review articles which address the above-mentioned topics or original research papers providing new evidence on the mitochondria–CNS pathological connection.

I look forward to reading your contributions.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Peter E. Nielsen**

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,

Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
