

## Supramolecular Protein Structures

Guest Editor:

### Prof. Dr. Victoria Bunik

1. Department of Biokinetics, A. N. Belozersky Institute of Physicochemical Biology, Lomonosov Moscow State University, 119234 Moscow, Russia

2. Department of Biochemistry, Sechenov University, 105043 Moscow, Russia

3. Faculty of Bioengineering and Bioinformatics, Lomonosov Moscow State University, 119234 Moscow, Russia

Deadline for manuscript submissions:

**closed (22 January 2022)**

### Message from the Guest Editor

Within recent decades, biology has faced a tremendous progress in the development of different techniques to identify and characterize molecular components of biosystems. Understanding the intracellular organization of these components as supramolecular structures is essential for our ability to perform metabolic regulation, which is required to solve medical and biotechnological challenges.

We would like to promote the understanding with this Special Issue contributed by different specialists. Supporting the exchange of methods and opinions between the related scientific fields, we intend to consider: (i) molecular mechanisms of the protein interactions with other cellular components, such as proteins, lipids, and nucleic acids; (2) multienzyme complexes and metabolones (i.e., associates of the enzymes of a certain pathway); (3) regulatory complexes and mechanisms of their transient formation and reorganization in response to specific stimuli; (4) methodical and bioinformatics approaches to characterize the multiprotein complexes and supramolecular structures; and (5) significance of protein interactions with other molecular components of a cell in health and disease.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Peter E. Nielsen

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,  
Blegdamsvej 3C, DK-2200  
Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer  
Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
