Copper Signaling and Redox Biology in Vascular Function and Disease

Message from the Guest Editor

Reactive oxygen species (ROS) and copper (Cu), an essential micronutrient, play important roles in human health and disease. However, the link between copper signaling and redox biology in vascular function and disease remains poorly understood. In particular, the molecular mechanisms by which the highly diffusible signaling molecule H_2O_2 is sensed by copper transporter proteins to regulate vascular function under physiological and pathological microenvironments are largely unknown. Addressing these knowledge gaps is the central goal of this Special Issue, '*Copper Signaling and Redox Biology in Vascular Function and Disease*'

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
