Molecular Research on Airway Diseases

Message from the Guest Editor

In this Special Issue entitled “Molecular Research on Airway Diseases”, we would like to focus on asthma, COPD and interstitial lung disease. The results of cell and molecular biology have provided a lot of hints for identifying molecules playing a pivotal role in a disease, and their involvement could be confirmed functionally by employing appropriate animal models and in the real world in humans by revealing their existence in the human specimens obtained from individuals suffering from a corresponding airway disease. The identification of the molecules involved could bring about a new therapeutic strategy or preventive approach as can be seen in the field of asthma in which various biological agents target identified molecules. Their efficacy could provide the real position of the target for the biological agent in the pathogenesis of the disease condition and could allow us to observe close relationships between molecules and clinical phenotypes. Moreover, the identified molecules could be good biomarkers for diagnosing a disease or assessing the condition of a disease as well as analyzing endotypes of airway diseases by means of the cluster analysis.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
