Obesity-Related Diseases in Children: Molecular Basis and Therapeutic Approaches

Message from the Guest Editors

Obesity is associated with a higher risk of the development of various noncommunicable diseases, such as cardiovascular disease, cancer, and diabetes, which are linked to increased mortality and morbidity. The preventive and therapeutic interventions in childhood obesity are crucial in decreasing the burden of comorbid health conditions. Complexity also applies in the management and prevention of childhood obesity, including the combination of lifestyle changes, intensive dietary approaches, anti-obesity pharmacotherapy, and/or bariatric surgery. The aim of this Special Issue, entitled “Obesity-Related Diseases in Children: Molecular Basis and Therapeutic Approaches”, is to gather original research manuscripts, meta-analyses, and reviews dealing with the molecular basis (an updated view of the emerging knowledge about epigenetics, nutrigenomics, neuronal, and hormonal aspects, among others) and therapeutic approaches of childhood obesity and related diseases.

Guest Editors

Prof. Dr. Dénes Molnár

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
