

Special Issue

Gametogenesis and Gamete Interaction

Message from the Guest Editor

Sexual reproduction is one of the most important events in living organisms, which is critical for creating new individuals and for the sustainable existence of each species. Even unicellular organisms or asexual reproductive organisms utilize sexual reproductive strategy for surviving in terrestrial environments. Sexual reproduction comprises gametogenesis and gamete interaction. The former includes meiosis and gamete maturation/morphogenesis, while the latter includes the events of sperm attraction and activation, species-specific and allo-specific gamete recognition and binding, acrosome reaction, sperm penetration of egg coat, gamete fusion, and egg activation. The present Special Issue focuses on the above topics in the sexual reproduction of animals and plants. In particular, the submission of original and review articles on the novel findings and idea of the molecular mechanisms of sexual reproduction will be greatly appreciated.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
