Advances in tRNA Biology

Message from the Guest Editor

This Special Issue, entitled “Advances in tRNA Biology”, will focus on the myriad of different functional roles played by tRNAs in biology. We invite the submission of reviews, research, and method articles that focus on any aspect of tRNA biology, including their canonical roles in tRNA aminoacylation and translation; alternative functions, e.g., as primers in viral reverse transcription; tRNA processing and modifications; and beyond.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
