Special Issue

Molecular Pathology, Diagnostics, and Therapeutics of Lung Disease

Message from the Guest Editor

Respiratory diseases are extremely diverse and include infectious diseases, bronchial asthma, chronic obstructive pulmonary disease, lung cancer, interstitial lung disease, and more. In recent years, diagnosis and treatment in these areas have steadily evolved and are poised for continued development. By gathering studies to share and discuss latest findings in this Special Issue. we hope to spark a movement in research and development, leading to new diagnostic and treatment methods and bringing about major changes. The keyword for this Special Issue is "exchange." For each field to evolve, the true nature of a disease must be identified. To uncover this, various ideas must be developed, and hypotheses must be formulated and proven. New trends can be created by engaging in this Special Issue. Hypothesis and proof are the essence of medical research. Let us gather, discuss, and consider the mystery of the respiratory system. We hope to make this Special Issue a success together with all of you. We look forward to your submissions.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in Biomolecules so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
