Novel Insights into Gamma Delta T Cells (γδ T Cells): Receptors, Molecular Targets, and Therapeutic Potentials

Message from the Guest Editor

Dear colleagues, The collection of articles in the current issue, entitled “Novel Insights into Gamma Delta T Cells (γδ T Cells): Receptors, Molecular Targets, and Therapeutic Potentials”, represents a platform for researchers to contribute to the rapidly expanding field of γδ T cell research. This issue welcomes original research, reviews and brief reviews pertaining to all aspects of γδ T cells. We are confident that these publications will enhance our understanding of this fascinating set of lymphocytes, impact the field of basic and clinical research and yield rich dividends in the future.

Interests: gammadelta T cells; T cell receptor; cancer; autoimmunity; infectious diseases; immunotherapy

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
