

Special Issue

Advanced Nanotechnology for Health and Diseases

Message from the Guest Editor

Advanced biomedical nanotechnology for health and diseases has emerged as a cutting-edge research field with tremendous potential to revolutionize healthcare. Nanotechnology-based approaches have the potential to provide targeted and personalized solutions for a wide range of health conditions, including cancer, cardiovascular diseases, neurological disorders, infectious diseases, and more. In this Special Issue, we invite researchers to contribute manuscripts highlighting the latest developments in using nanotechnology to diagnose and treat various health conditions, including cancer, Alzheimer's disease, cardiovascular disease, and infectious diseases, among others. We welcome submissions in the form of reviews, research articles, communications, and hypothesis that focus on the design, synthesis, and application of innovative nanotechnologies for biomedical use. Our goal is to provide a platform for researchers worldwide to share their insights and findings, accelerate progress, and promote translating these technologies into therapeutic applications.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
