Brain Sterols: Biosynthesis and Physiology in Health and Disease

Message from the Guest Editors

The brain fully relies on its intrinsic sterol biosynthesis. Cholesterol in the nervous system is a critical structural component of cellular membranes and lipid rafts, required for synapse and dendrite formation and axonal guidance, and it serves as a precursor for various biosynthetic pathways. In this Special Issue, we explore brain sterol biosynthesis, turnover, function, distribution, and pathophysiological changes associated with inborn errors of sterol metabolism, development, aging, and neuropsychiatric disorders. We also explore medication effects on brain sterol biosynthesis through the lifespan. We welcome your reviews and original data articles on this very important research topic.

Guest Editors

Prof. Dr. Karoly Mirnics

Munroe-Meyer Institute for Genetics and Rehabilitation, University of Nebraska Medical Center, Omaha, NE, USA

Prof. Dr. Zeljka Korade

Department of Pediatrics, College of Medicine, University of Nebraska Medical Center, Omaha, NE, USA

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
