Advances in Cellular and Molecular Mechanisms in Immuno-Oncology and Onco-Hematology

Message from the Guest Editor

Research on immune checkpoint inhibitors, such as PD-1/PD-L1 and CTLA-4 blockers, is expanding, revealing new combinations and biomarkers for enhanced efficacy. Understanding the mechanisms of tumor immune evasion is crucial, with studies focusing on the tumor microenvironment and immune escape pathways. Additionally, novel targeted therapies, including CAR T cell therapy—which reprograms immune cells to target cancer cells—are being developed to address specific altered molecular pathways in hematologic malignancies, offering more personalized and effective treatment options. These innovations are driving significant progress in cancer therapy. We invite you to contribute your research and reviews to this Special Issue, which will serve as a comprehensive resource for researchers, clinicians, and practitioners dedicated to advancing cancer treatment in the rapidly growing fields of oncoimmunology and oncohematology.

Guest Editor

Dr. Paolo Fagone

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
