Antioxidant and Anti-Inflammatory Activities of Phytochemicals

Message from the Guest Editors

Plant-derived bioactives, which are alternatively referred to as plant secondary metabolites, are widely distributed in nature with many possessing antioxidant and anti-inflammatory properties. At the biochemical and molecular level, these compounds act on cell signaling systems in cells and mediate cellular responses to stress. Each year, new molecules with interesting biological properties are identified, and new biological roles for previously characterized compounds are described. These molecules are of key importance to scientists with interests in improving the quality of foods, or as target molecules that are useful in drug development. Collectively, many of these compounds are promising drug candidates, potential functional food ingredients, useful targets in plant breeding programs, or simply chemical tools used to manipulate cell signaling networks. This Special Issue welcomes original research and reviews of literature on all aspects of antioxidant and anti-inflammatory phytochemicals that can be exploited in food sciences, pharmacology and human health.

Guest Editors

Dr. Peter Rose

School of Biosciences, University of Nottingham, Loughborough, Leicestershire LE12 5RD, UK

Prof. Dr. Yi Zhun Zhu

1. School of Pharmacy and State Key Laboratory of Quality Research in Chinese Medicine, Macau University of Science and Technology, Macao 999078, China

2. Shanghai Key Laboratory of Bioactive Small Molecules, Department of Pharmacology, School of Pharmacy, Fudan University, Shanghai 201203, China

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
