

## Special Issue

# Molecular Genetics and Molecular Diagnosis in Precision Oncology

### Message from the Guest Editor

The landscape of cancer treatment is undergoing a fundamental transformation, moving away from a one-size-fits-all approach to an era of precision oncology. At the core of this paradigm shift is the integration of molecular genetics and advanced molecular diagnostics, which enable the comprehensive characterization of a tumor's unique genetic and molecular landscape. By deciphering the specific genomic alterations, transcriptomic changes, and other molecular signatures that drive a patient's cancer, clinicians can move beyond organ-based classifications to provide personalized, targeted therapies that maximize efficacy and minimize toxicity.

This Special Issue explores the latest advances in harnessing molecular insights to drive precision oncology. Contributions cover a wide spectrum from cutting-edge technologies like next-generation sequencing (NGS) and liquid biopsy for real-time monitoring to the interpretation of complex genetic profiles. We also delve into the critical challenges and future directions, including overcoming tumor heterogeneity, improving actionable target identification, and ensuring equitable access to these technologies.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
