

## Special Issue

# Advances in Drug Repurposing: New Functions for Existing Molecules

### Message from the Guest Editor

I invite you to submit a manuscript to the Special Issue entitled *Advances in Drug Repurposing: New Functions for Existing Molecules*. Recent advances in the detection of diseases, including cancer, at earlier stages has opened up the use of new therapeutics in the treatments of many diseases. There has been an influx of studies on novel treatments; however, current therapeutics are a resource that has significant traction in re-use as therapies in other conditions, particularly in cancer. This Special Issue aims to highlight seminal research on the re-use of current therapies in new and innovative ways.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
