

## Special Issue

# Cellular Signaling and Cardiovascular Diseases: From NF- $\kappa$ B to Golgi Dynamics

### Message from the Guest Editor

Cardiovascular diseases (CVDs) are a leading cause of morbidity and mortality worldwide and are driven by multifaceted cellular and molecular mechanisms.

Vascular cells, particularly endothelial cells (ECs) and vascular smooth muscle cells (VSMCs), play central roles in maintaining vascular integrity and function. The dysregulation of signaling pathways in these cells contributes to inflammation, immune activation, and pathological remodeling characteristics in many CVDs. Among these pathways, NF- $\kappa$ B signaling has been extensively studied for its role in promoting vascular inflammation and immune responses. In parallel, epigenetic regulation and emerging insights into subcellular organelle dynamics—such as Golgi apparatus remodeling—have opened up new avenues for understanding the progression of cardiovascular pathology.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
