

Topical Collection

Bioactive Lipids in Inflammation, Diabetes and Cancer

Message from the Collection Editors

Lipids are essential components of the cell membrane shown to play many roles in mediating and controlling a wide array of cellular activities including membrane structure and organization, metabolic and gene regulation, protein structure and function, and signaling pathways. Various lipid molecules have been intimately linked to inflammatory and immune responses, cell proliferation and apoptosis and clearly shown to be major contributors to many pathologies including, diabetes, cancer, cardiovascular disease, and neurodegenerative disorders. Lipid metabolizing enzymes and lipid receptors are excellent targets for the development of enzyme inhibitors and receptor modulators as novel therapeutic agents.

The aim of this Topic Collection is to compile review articles and original research articles covering the recent advances in the biochemistry, chemistry, pharmacology, analysis, functional assessment, and clinical translational impact of bioactive lipids relating to their involvement in inflammation, diabetes and cancer.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
