

Special Issue

Bioactives from Marine Products

Message from the Guest Editor

Natural compounds have long been providing inspiration for medicine and health products. In particular, bioactives from marine products provide ample opportunities for us to develop pharmaceuticals and/or nutraceuticals. Therefore, this "Bioactives from Marine Products" Special Issue aims to gather the most relevant and new research articles in the field, including but not limited to the chemical and biological extraction, identification, screening and testing of marine bioactives; the pre-clinical and clinical investigation of marine bioactives in either nutrition or medicine; and the development of bioactives into nutraceuticals or pharmaceuticals. We hope to capture the progress and development in this important field. It is also a good chance for scientists who are working in this field to showcase their recent findings and attract the attention of their peers and the wider readership of this journal.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
